

WEB DEV POOL

< A GREAT TOOL TO FIND A JOB />

WEB DEV POOL

For the next two days, you'll train your HTML/CSS skills and upgrade your resume at a new level.

Design and create a page (or a set of pages) that you could host to have an online resume.

Feel free to add animations and stuff, it can both improve your resume for the viewer and show your personality.

You should organize cleverly your information, files and directories!
The usage of frameworks and librairies is authorized and welcome.
Remember that the viewers could be some potential recruiters.

You must respect at least the following constraints:

- ✓ your code must be clean and use the proper HTML and CSS properties ;
- ✓ your code must present a clear separation between HTML and CSS ;
- ✓ your website must be responsive.

Here are some creative and original examples:

- ✓ [inspired by amazon](#) ;
- ✓ [interactive video game](#) ;
- ✓ [interactive 3D](#).

v 2.1
